Summary

My name is Johan Sebastian Castro García. Programmer with +3 years of experience in application development. Specialized in Frontend, passionate about Open Source. I integrate myself into diverse work teams and I strive to build strong relationships with my colleagues.

Technical Skills

- **Programming Languages:** HTML, CSS, JavaScript, TypeScript
- **Web Technologies:** Vue, React, Preact, Nuxt, Next.js
- **Databases:** SQLite, PostgreSQL
- **Cloud Services:** Google Cloud Platform (GCP)
- **Tools:** Git, Github, Docker, Vscode
- **Other:** C, Shell, Python, Zig

Professional Experience

DiensCO (Frontend Developer**) June 2023 - Feb 2025**

- Previously domiplace.com only had a mobile app, so my team and I started building the web app..
- has been migrated with existing admin.efici.co from Vue 2 to Nuxt.js and performance increased by 100% Unlike its previous version.
- An order management application has been successfully created in order to have an even faster alternative to domiplace.com
- The admin.efici.co application had logic errors and was not user friendly. The migration helped so much that it allowed us to correct 70% of the errors and we were always working continuously to have 100% coverage.

Education

I finished high school in November 2021 and from there I began my journey in the world of software. I took two courses at Google Active, which are Cloud Computing and Web Development. I have also won certificates in Udemy and CodigoFacilito, all with a learning purpose.

Language

- **Inglés A1** (Próximamente A2)
- **Español** (Nativo)
